

Chapter-2

1. What is self-management? Why is it important for students?

Answer:

Self-management is the ability to control and manage our thoughts, emotions, behaviour, time, and activities effectively. It helps a person stay organised and work towards their goals.

Self-management is important for students because:

1. It helps students **manage their time** properly.
2. It helps them **control stress and emotions**.
3. It improves **concentration and focus** on studies.
4. It helps students **set and achieve their goals**.
5. It develops **self-confidence, discipline, and responsibility**.

Thus, good self-management helps students perform better in studies and handle different situations in a positive way.

2. What is self-confidence? How can a student develop self-confidence?

Answer:

Self-confidence is the belief in one's own abilities, skills, knowledge, and decisions. A confident student believes that they can learn and complete tasks through effort and practice.

A student can develop self-confidence by:

1. **Setting small and achievable goals** and completing them.
2. **Practising regularly** to improve skills and knowledge.
3. **Thinking positively** and avoiding negative thoughts.
4. **Learning from mistakes** instead of being afraid of failure.
5. **Participating in activities** such as discussions, presentations, sports, and competitions.

Self-confidence develops gradually through practice, positive thinking, and learning from experiences.

3. What is motivation? Differentiate between internal and external motivation.

Answer:

Motivation is the feeling or reason that encourages a person to take action and achieve a goal. It helps a person stay focused and continue working even when a task is difficult.

There are two main types of motivation:

Internal Motivation

It comes from within a person.

External Motivation

It comes from outside a person.

Chapter-2

Internal Motivation

A person performs an activity because they enjoy it or find it meaningful.

It does not depend mainly on external rewards.

Example: Studying because you enjoy learning.

External Motivation

A person performs an activity to receive a reward or avoid a punishment.

It is influenced by rewards, praise, grades, or recognition.

Example: Studying to get good marks or a prize.

Both types of motivation can encourage a student to work towards their goals.

4. What is stress? Mention any three ways to manage stress.

Answer:

Stress is a feeling of pressure or worry that a person may experience when facing difficult or challenging situations. For example, a student may feel stressed because of examinations, assignments, or deadlines.

Some effective ways to manage stress are:

1. **Time management:** Make a proper timetable and complete work on time.
2. **Physical activity:** Exercise, play sports, or take a short walk to relax the mind.
3. **Relaxation:** Practise deep breathing, meditation, or other relaxation activities.
4. **Proper sleep:** Get enough rest to keep the body and mind refreshed.
5. **Talk to others:** Discuss problems with parents, teachers, or trusted people.

Managing stress properly helps students remain calm and concentrate better.

5. What is goal setting? Write any three characteristics of a good goal.

Answer:

Goal setting is the process of deciding what we want to achieve and making a plan to achieve it. Goals give direction and motivation to our efforts.

A good goal should have the following characteristics:

1. **Specific:** The goal should clearly state what needs to be achieved.
Example: "I will improve my Mathematics marks."
2. **Measurable:** It should be possible to measure the progress or result.
Example: "I will score at least 80% in Mathematics."
3. **Achievable:** The goal should be realistic and possible to achieve with proper effort.
4. **Relevant:** The goal should be useful and related to our needs or purpose.
5. **Time-bound:** The goal should have a specific time limit for completion.

Setting clear goals helps students stay focused and organised.

Chapter-2

6. A student becomes nervous before an examination and finds it difficult to concentrate. What self-management techniques can help the student?

Answer:

The student can use several self-management techniques to reduce nervousness and improve concentration:

1. **Make a study timetable:** Divide the syllabus into smaller sections and study according to a planned schedule.
2. **Set small goals:** Complete one topic or chapter at a time instead of worrying about the entire syllabus.
3. **Practise relaxation:** Use deep breathing or take short breaks when feeling nervous.
4. **Think positively:** Avoid negative thoughts and remind yourself that preparation and practice can improve performance.
5. **Get proper sleep and rest:** Adequate sleep helps the mind remain fresh and improves concentration.
6. **Revise regularly:** Regular revision can increase confidence and reduce last-minute pressure.
